

DEAR COLLEAGUES AND FRIENDS

Theranostics is THE way to make nuclear medicine REVIVE. Theranostics World Congress in 2019 (TWC2019) is the fifth occasion following the first in Bad Berka of Germany (Richard Baum), India, USA, and Australia, now in Korea.

In March 1-3 2019 in Jeju of Korea, the world's leading experts will present their future prospects of expanding theranostics to other diseases than the currently well-established NET and CRPC treatments. Uniquely here, the next-generation leaders from Asia and developing countries are going to be invited by KAST (Korean Academy of Science and Technology) with the help of EU (TEIN: Trans-Eurasia Information Network) and KOICA (Korea International Cooperation Agency) and will join and discuss their start-up endeavor in theranostics in each country/ institution.

Expanding vision beyond the current status quo in theranostics and nuclear medicine and geographic expansion of this breakthrough are the two main goals of this TWC2019. Your participation will accomplish the long-overdue aim.

See you all in fantastic Jeju.

All the best,

0133
