

Henry Vanbrocklin

The University of California, San Francisco (UCSF), USA

Henry VanBrocklin, PhD, is a Professor in Residence, Director of the Radiopharmaceutical Research Program in the Center for Molecular and Functional Imaging (CMFI) at the University of California, San Francisco China Basin, and he is a Joint Faculty Scientist at the Lawrence Berkeley National Laboratory. Dr. VanBrocklin obtained his PhD in Radiopharmaceutical Chemistry from Washington University, St. Louis in 1990, and he completed a two-year postdoctoral program at the University of Illinois, Urbana in 1992. He maintains an active radiotracer research program in addition to providing tracers for collaborative basic science and translational clinical research. His research interests include short-lived radioisotope production to the creation of fluorine-18 and carbon-11 labeling chemistry strategies for new radiotracer preparations and applications.
